

(1) Based on APR scores, many Bayside student-athletes are above average academically compared to other Division I schools:

Speaker notes: On averages based off the last four school years, Bayside student-athletes have a better APR than the average of all Division I athletes in 8 out of 10 sports. The two sports that have struggled in the past are WTEN and MSO. However, we have been working with the teams to ensure that they are successful on and off the field. They have significantly improved over the last year as you can see from their progress shown in the next figure.

(2) Based on the most recent APR scores, Bayside teams do better academically than many teams in their conference:

Speaker notes: Based off recent APR scores, eight out of the ten sports have a higher or the same multi-year average as the entire Metro Conference. Overall, Bayside State's multi-year averages are up 18 points over last year with the men's soccer and women's tennis improving the most. In the next figure, the highest scores at the conference are highlighted in gold. Last year, four of the ten sports had the highest single-year average and three of our teams had the highest multi-year average at the conference.

	MMY	Bayside MY	Bayside SY
WBB	963	985	982
MBB	953	972	964
MWP	977	992	1000
WVB	970	985	957
